(A) Flash Tank with Air Pressurized Bladder

NEW! Soldiers know the field all too well — the physical demands are grueling, temperatures are often unbearable and moments of rest are few and far between. Constant hydration is a necessity! Our Flash Tank, an insulated hydration system, is highlighted by a pressurized bladder that will hold up to 50 ozs. of your preferred liquid. The urethane bladder has two compartments (one for fluid and one for air). Just fill it up with liquid and use the included bike pump (with Schrader valve) to air it up! The leakproof screw-top closure allows for easy filling, while the regulator maintains the pressure, even as the liquid is dispensed. The bladder also features a depressurizing valve. The oversize high-flow tubing and high-volume bite valve work together to release the fluid both quickly and conveniently. The valve has an incredible flow rate! The non-sloshing pack is made of durable Cordura® nylon and features an exterior pocket (which measures 15 x 7"), a breathable, wicking back panel, removable foam insulation (1/4" closed cell foam), CoolMax® shoulder straps, triple welded seams, taped edges, top-quality zippers an adjustable sternum strap and an interior key clip. The twin grab loops simplify handling and storage. Also ideal for campers, hikers and bike patrol. USA. Measures 15 x 7 x 2". Wt: 18 ozs. **Black.**

AA 18267.....$59.95

(B) 50-OZ. PRESSURIZED BLADDER.

NEW! This dual-chambered urethane bladder features a patented pressure regulator that insures constant flow with one-time pressurization. The unique bite valve provides fast flow and great seal. Simple to clean! USA. Wt: 10 ozs.

AA 18268.....$39.95

U.S.M.C. Issue MOLLE System

NEW! This is the most advanced **MO**dular **L**ightweight **L**oad-Carrying **E**quipment (MOLLE) System ever developed. Specially engineered for the U.S.M.C., this modular load-bearing system has been designed to increase a soldier's chances for survival. This versatile system is completely modular, meaning that it's made up of standardized pieces that can be assembled to a soldier's specific mission. This unique MOLLE System is unlike any other in that it was developed to be worn, instead of carried. Outstanding adaptability allows it to improve mission efficiency without compromising a soldier's movement, mobility or readiness. The system is made of the finest materials available, including high quality 1,000-denier Cordura® nylon. All of the system's fabric has been treated for maximum water repellency. USA. Wt: 18 lbs. **Woodland Camo.**

Quick-Release Feature

THE PACK FRAME, PACKS and POUCHES.
The MOLLE pack frame is the foundation upon which this remarkable system is built. The anatomy of the backpack is structured around an integral lightweight external polymer frame which distributes the weight of the load from the shoulders to the hips. The shoulder straps and lumbar pad are wide and padded for ultimate comfort. This yields the soldier optimum ergonomical load-carrying abilities. The pack's main rucksack features drawstring closure, a removable SINGARS radio pocket, an additional belt that can be used in conjunction with the LBV, a map case and has approximately 2,300 cubic inches of carrying space. The pack is also highlighted by a Claymore mine pocket that is loaded with useful accessories (eight replacement buckles, extra webbing, two keeper adapters for attaching other necessary gear, an on-the-move two-liter drinking system and two six-foot lashing straps for tying the pack down to a truck or tank). The Claymore pocket also contains a removable six magazine bandoleer pouch that can be worn around the shoulder. The pack has also been constructed with two sustainment pouches (one on each side) for carrying extra gear and a water pocket. The removable sleep system carrier is perfect for carrying a sleeping bag or bivy cover. A 1,200 cubic inch combat patrol pack (also sold separately below) has been attached to promote even more carrying power.

THE COMBAT PATROL PACK.
If you only need this portion of the MOLLE system, we offer it separately because this pack can be worn by itself. USA. Wt: 2 lbs.
AA 18347.....$99.95

THE VEST.
The vest, which is secured at the waist by a molded foam belt, is fully adjustable and ideal for a number of different body sizes. An included butt pack can also be easily attached to the vest. The waistbelt contains a sturdy polymer socket that acts as the attachment point for the pack frame. When the soldier needs to escape from a hostile situation with quickness and speed, this unique easy-to-release socket allows the soldier to effortlessly shed the pack frame from the vest's waistbelt. When the locking straps across the wearer's chest are released, the pack swivels rearward on the lumbar attachment and falls to the ground.

MOLLE SYSTEM CONFIGURATIONS.
We're offering the system in four different versions. You will receive the packs with all the features mentioned at left, the frame and the vest. Order the configuration below that meets your needs for the vest pouches. Prices below are for the complete system, including the combat patrol pack.

CamelBak™ MaXimum® Gear

CamelBak™ understands your body's need to perform at peak efficiency. That's why they've specially designed comfortable hydration systems to help meet those needs. Intense and prolonged activities take a toll on your body's ability to maintain fluids — on a hot day when engaged in a vigorous activity, your body can easily perspire over two liters of water in an hour. For that reason, we're proudly announcing CamelBak™ MaXimum® Gear — a variety of products solely constructed to allow you to carry the fluids you need with maximum capacity, endurance and convenience. Highlighted by a strong, non-sloshing polyurethane CamelBak™ bladder, each product features padded straps with quick-release buckles, Monster Flow™ insulated tubing, a friction fit bite valve and hands-free hydration. (K) D-2 Stalker

EXCLUSIVE

As seen in "S.W.A.T.", "Tactical Edge", and many other law enforcement and hunting publications, this totally unique camouflage system allows its wearer to naturally melt into the surroundings of nearly any environment by erasing the line of the silhouette. In addition to removing the human form, the system is made of three-dimensional camouflage and weighs only two lbs. The D-2 Stalker, currently used by U.S. Army Special Forces, is integrated into a fanny pack of the same material that can be secured to the waist via a fully adjustable 2" wide nylon belt with a quick-release buckle. Unlike any other camouflage, the D-2 Stalker can be configured into four distinctly different concealment options — low crawl, low mobility, high mobility and can be taken completely off the body to be used as a 6 x 9' stationary blind. A VELCRO® brand fastener and D-ring strapping system allows the user to configure it into the desired option quickly and effectively. In any of the configurations, the system is large enough to conceal the user, a rifle and personal equipment. Can be shed effortlessly in less than five seconds. An optional hood and string kit are sold separately (below). One size fits most. USA. Wt: 2 lbs. Specify **Woodland Camo or Advantage®.**

PROFORMANCE CLOTH™

A highly comfortable uniform fabric that's a lifesaver in warm climates. Constructed of 100% cotton ripstop, ProFormance™ Cloth was specifically developed for the military as a uniform attire for unseasonably hot and humid climates. Wearers will greatly appreciate the countless benefits associated with professional-looking ProFormance™ Cloth. Coupling the natural cooling benefits of cotton with the strength of ripstop, ProFormance™ Cloth will exceed your highest expectations. Cotton is preferred due to its high level of comfort, moisture-absorbing qualities and remarkable breathability. Ripstop, on the other hand, is cherished because of its ability to reduce run-on ripping while also being exceptionally tear-resistant. In the heat of battle, ProFormance™ Cloth will be your body's most dependable line of defense!

ProDura™ Cloth Police Uniform

To better serve law enforcement professionals and agents, we've taken ProDura™ Cloth a step further by incorporating it into a high-performance, yet affordable police uniform. Sewn to the same rigorous standards as our traditional Battle Dress Uniforms (BDUs), this comfortable uniform system is guaranteed to endure the rigors of a law enforcement officer's everyday, fast-paced lifestyle. The uniform is as strong and durable as a BDU, but has a more eye-appealing, form-fitting and tailored look. So, no matter what your duty calls for, whether it's chasing down a criminal on foot or responding to an emergency behind the wheel of your vehicle, this uniform yields top-notch performance qualities and unmatched comfort. Year after year, you'll be amazed by its incredible ruggedness and unerring dependability. Easy to care for as well, this highly professional uniform is wrinkle- and fade-resistant.

FEDERAL CLOTH

A top choice among several federal agencies — including the FBI, CIA, DEA and countless other high-profile, law enforcement organizations — Federal™ Cloth has achieved elite status among uniform attire. Incorporating a heavy 65% polyester and 35% combed cotton blend in a durable ripstop weave, Federal™ Cloth is incredibly rugged, yet still yields a high level of comfort. Federal™ Cloth receives additional high praise because of its unmatched durability, colorfastness, abrasion and tear resistance. Of even greater importance, Federal™ Cloth is constructed to endure the brunt of almost any overexerting lifestyle — even after several years. Designed with breathability in mind, Federal™ Cloth can be comfortably worn in all climates. Additionally, Federal™ Cloth is lightweight, quick-drying, wind-, shrink- and wrinkle-resistant. In the office or on the streets, Federal™ Cloth will always guarantee a top-notch, professional look.

(M) New Generation Layering System

Welcome to the "new generation" of thermal activewear! Our system is the preferred choice as the first layer of the Extended Cold Weather Clothing System. Incorporating the revolutionary filament called Innova® polyolefin into Duofold's four-way stretch, two-layer system, it's a paramount choice because of its moisture management capabilities. Polyolefin won't absorb moisture into the fiber, thus making it very quick-drying. It's also highly breathable — forcing moisture to move away from the skin in the vapor stage thus eliminating condensation. Polyolefin also possesses a very low thermal conductivity — which allows the wearer to stay warm. Polyolefin is lightweight (30% lighter than polyester and 20% lighter than nylon), so it's ideal for any activity. Plus, it's colorfast, abrasion-, chemical- and odor-resistant. Machine washable. Made in Honduras with U.S. materials. **Brown.**

(A) Fleece Tech System

When Old Man Winter releases his wrath (i.e. the cold breezes and frigid temperatures), you'll be thankful to have our Fleece Tech System. The pants and the jacket (both sold separately) are constructed of 200-gram fleece. A very popular fabric, fleece is softer than cotton, warmer than wool and very lightweight. Fleece retains extraordinary warmth, yet lets body moisture vapor escape. This comfortable apparel also features a water-resistant non-pilling velour finish. Tiny air pockets within the finish create an insulating zone. All seams and stress points are double reinforced. Perfect for active outdoorsman. USA. Wt: 2 lbs. each. **Black.**

FLEECE TECH JACKET. Features four-ply nylon Supplex block on the chest and back, a full zipper, adjustable shockcord waist with cordlock fasteners and three zip pockets. Sizes: S, M, L, XL and XXL.

(B) U.S.M.C. Fleece Jacket *EXCLUSIVE*

NEWLY TYPE CLASSIFIED!

Designed to complement the Extended Cold Weather Clothing System (ECWCS). The U.S.M.C. Fleece Jacket provides extra protection without restricting mobility. Worn under ECWCS, the jacket yields an extra layer of protection against unsuitably cold temperatures. Highlighted by POLARTEC® 300 fabric, which renders exceptional warmth without added weight. The air pockets on both sides of the jacket trap body heat, thus creating thermal insulation. It features a full-length front opening with a two-way slide fastener backed by a wind protection flap, a collar and raglan sleeves with hook-and-loop adjustable wrist cuffs. Plus, it has two internal mesh chest pockets and two handwarmer pockets lined with CoolMax®. Also features Taslan nylon reinforcements on the upper back, shoulders, upper chest and elbows. All slide fasteners have thongs for ease of opening when wearing gloves. Looks great as an outer garment or with jeans. NSN 8415-00-NSH-0338. Sizes: S, M, L and XL. USA. Wt: 2 lbs. **Black.**

(C) Military All-Weather Parka (MAWP)

Based on the current Army Mil spec protective parka, the MAWP yields exceptional all-weather protection. Constructed by I. Spiewak & Sons, Inc., one of the oldest U.S. government contractors, this parka has an abundance of quality features. The garment is highlighted by a waterproof Tritel nylon shell which features taped seams to prevent leakage. It also showcases water-resistant, breathable Supplex® nylon, which looks, feels and breathes like soft cotton. Supplex® is stain- and fade-resistant as well. A strong and highly durable parka, it's lightweight and packable. Other features include: snap storm fly over front zipper, weatherproof handwarmer pockets, an extended protective hood with front visor, "Pit-Zips" for maximum ventilation, VELCRO® brand concealed map pockets and adjustable cuffs. Machine washable. Sizes: S, M, L, XL and XXL. USA. Measures 30" long. Wt: 3 lbs. Specify **Black, Tan or Woodland Camo.**

ECWCS Attire is the ultimate Defense Against Mother Nature's Outdoor Elements!

D

(D) ECWCS Attire with GORE-TEX® Fabric

Superior head-to-toe protection against wind and rain in a system that's second-to-none in design and appearance. Our **E**xtended **C**old **W**eather **C**lothing **S**ystem is made of waterproof, windproof and breathable GORE-TEX® fabric. That enables it to be the ultimate defense against cold weather, rain, snow and sleet. We've taken the Military designed ECWCS — which stands up to stringent Military specifications — and made some improvements, such as the addition of a quick-drying Supplex shell. We've left the intricate parts — the durably waterproof, windproof, breathable GORE-TEX® membrane, nylon tricot fabric and the unlaminated hung liner — that make it a high-performance product. In order to serve the public service industry (from law enforcement to wildlife service), we're offering the system in three colors — Khaki, Forest Green and Navy. Three-layer construction (Supplex/GORE-TEX® membrane/nylon tricot fabric) highlights both the Parka and the Trousers. Makes for great casual outdoor wear as well. USA.

ECWCS PARKA. Features large underarm ventilation zippers, an internal snap snow skirt, storm protected, flap-front pockets with VELCRO® and snap closures, double layer reinforced elbows, double storm flap zipper with snap-down outer flap, Cobra peripheral vision oversized hood with visor and drawstring, large double breast map pockets, sleeve pocket, drawstring hem and VELCRO® closure cuff adjusters. REVIVEX® Water and Stain Repellent

All GORE-TEX® fabric garments are coated with a durable water repellent (DWR) finish that allows water to bead up and roll off instead of being absorbed. Eventually the DWR will be worn off by normal use. REVIVEX® Water and Stain Repellent is the only home-applied treatment for GORE apparel products that restores water repellency. Specifically engineered by W.L. Gore & Associates, Inc., it's easy to use. After washing the garment in warm water (utilizing no detergent), spray the outside of the garment thoroughly with REVIVEX®. Then, simply throw the garment into the dryer (separately) for 50 minutes on medium heat. REVIVEX® is water-based with no solvents, heat-activated and won't harm your dryer. One 10-oz. (295 mL) bottle treats from two to four garments. USA. Wt: 1 lb. *Follow all directions carefully!*

Matterhorn® A.T.D. (Arctic-To-Desert) ComforTemp™ Boot

Exclusive! An incredible technological breakthrough! The Matterhorn® A.T.D. ComforTemp™ Boot is designed to endure the most extreme weather conditions. Whether it's 10° or 100°F, this boot will provide the best thermal protection available. Originally created for the military, ComforTemp® insulation is a smart foam lining that knows to draw heat away from your foot when it's hot, so you stay cool. It then stores this heat for release later when your feet are cold. It is the first material of its kind designed to keep your feet cool when it's warm and warm when it's cold! Because of this open-cell, breathable, high-tech foam (regardless of the outside temperature), the temperature surrounding your foot inside the boot will remain a comfortable 83°. The boot is also highlighted by Cambrelle® lining and a waterproof, breathable GORE-TEX® bootie. The long-wearing, cushion lining absorbs perspiration and dries quickly, while the leather is also 100% waterproof. A leather comfort collar keeps the boot snug and comfortable, while the cushioned insole reduces shock. The high-tech Vibram® Sierra sole guarantees maximum traction and stability on several types of terrain. Steel shanks provide arch support. Eyelets and D-rings aid speed lacing. FOX RIVER

(Q) Silver Liners

NEW! Kiss foot fungus goodbye forever! Researched and tested by Penn State University and Cornell University, these silver-lined sock liners provide antibacterial and antifungal protection. Made with a blend of 7.6-denier nylon fiber and a silver-coated fiber, called X-Static®, Silver Liners have proven to drastically reduce the effects associated with several harmful bacteria, including T. mentagrophytes, K. pneumoniae and E. coli. Silver (Ag+) is predominantly used in the medical market for treating and preventing the infection associated with burns and other ailments. These liners also yield outstanding anti-static performance, thermal conductivity and heat transfer (as the temperature rises, the effectiveness of X-Static® increases). Materials: 60% polypropylene, 19% X-Static® nylon, 18% stretch nylon and 3% elastic. Sizes: M and L. USA. Wt: 1 oz. **Gray/White.**

MAGNUM HI-TEC®

Hi-Tec® takes Great Pride in Meeting all of Your Footwear Needs.

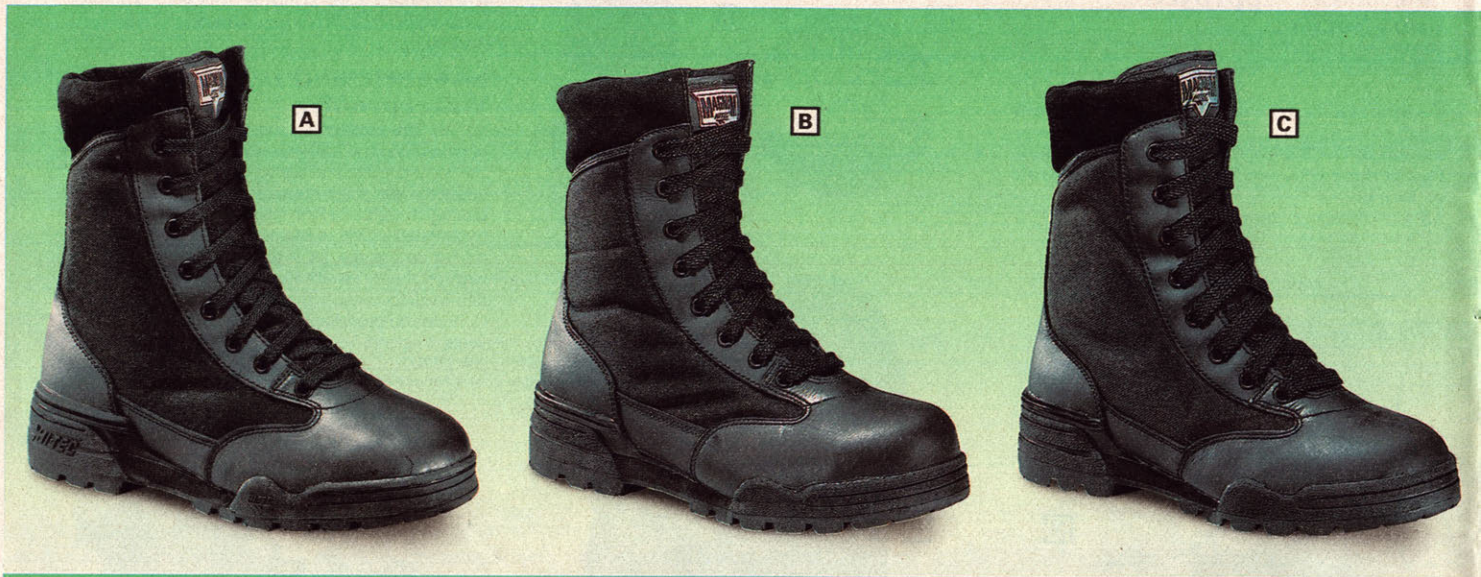
Hi-Tec® strives for perfection when it comes to creating and designing high-performance, lightweight tactical footwear. By implementing the BootLogic system into most of their boots, they've taken comfort, durability and performance to the highest level possible. BootLogic is the result of countless hours of extensive testing in biomechanics laboratories and out in the service professional's working environment. Regardless of the task at hand, the BootLogic system helps you to stand firm and confident. BootLogic features the following:

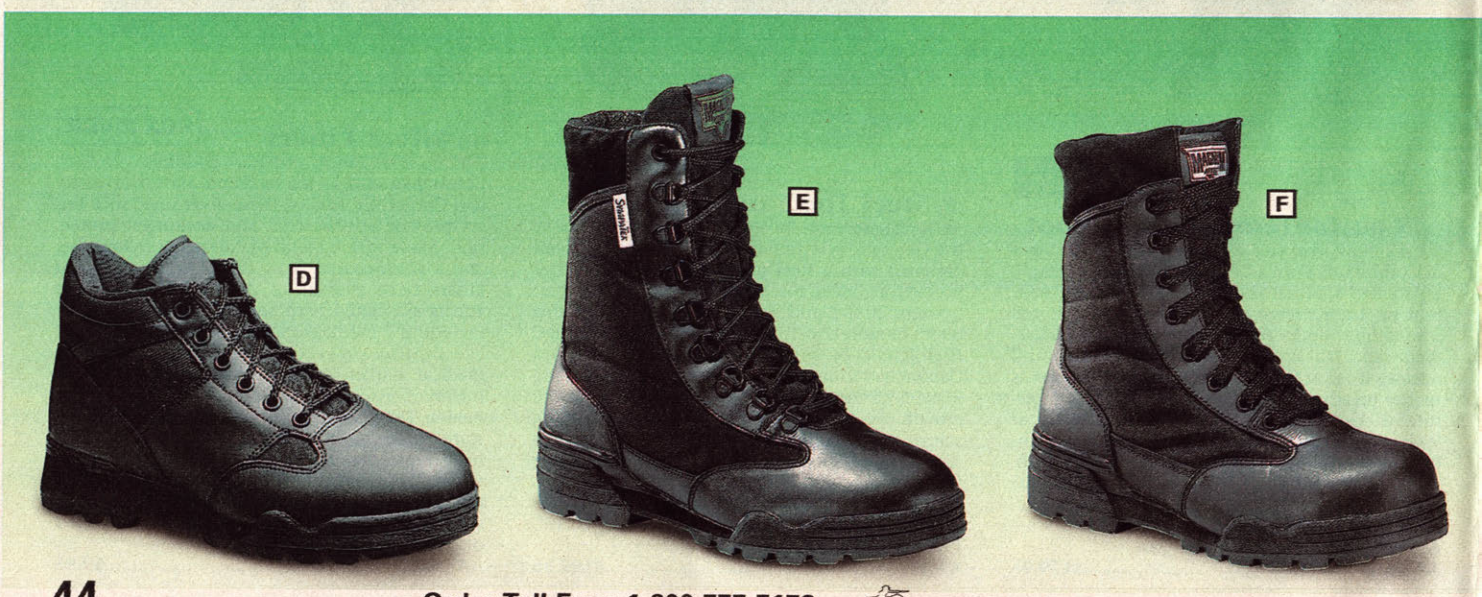
ComforTongue — Unlike single flat tongues that can cause discomfort and foot fatigue, the ComforTongue is anatomically sculpted to fit the contour of the foot. Provides added protection from water, snow and other elements.

Tendon/Shank Suspension Midsole — The integrated polymer heel/shank yields impact protection and torsional stability.

Tendon Suspension Midsole — Provides superior impact protection. Made of a flexible polymer material, the midsole is highly shock absorbent and will not wear down, even under extreme conditions.

TSD Outsole — Regardless of the ground surface, the long-lasting rubber outsole provides outstanding traction, support and durability.





(G) Trooper Boot

This lightweight, entry-level tactical boot provides comfort, durability and stability. (P) Discreet Gun Case

Made of full-grain leather, it looks like something that might house a daily planner. In actuality, it securely holds a handgun and a spare clip. The inner holster, which can be easily moved for right- or left-handed draw, is designed to fit most 380, 9mm, .40 and .45 caliber automatics. Also will fit small frame revolvers with 2-4" barrels. Ideal for carry in a vehicle or for placement in an office bookshelf, the Discreet Gun Case won't attract the attention of others. It also features an inside pocket for a concealed weapons permit holder. Dual zipper closure. For security purposes, it can be locked via a padlock (not included). Imported. Measures 9½ x 6¼ x 2". Wt: 12 ozs. **Black.**

ORDERING INFORMATION

Need Fast Delivery?

We offer same-day, next-day, two-day, Standard Ground Service, Express® Airmail USA, Express Mail Military Service and Parcel Airlift (PAL) to APOs and FPOs. APOs and FPOs without proper Express Mail or PAL charges will be shipped Space Available Mail (SAM). For Alaska and Hawaii addresses, add $10 to the base express rate. Express orders received after 12:00 p.m. EST will be shipped the next business day, upon authorization and verification, if merchandise is in stock. Your credit card will not be billed until after merchandise is shipped. Freight charges are based on packages up to 10 lbs. Heavier or oversized packages require extra postage. If paying by credit card, your card will be charged the actual cost of the extra amount. Contact us for same-day rates.

We cannot guarantee express delivery times on items requiring custom work (engraving, sewing, alterations, etc.), out-of-stock items or items drop-shipped from our suppliers. When custom work is completed it will be shipped via the delivery service you paid for. If part of your order is out of stock, we will ship the available merchandise via the delivery service you paid for. When the out-of-stock item becomes available, it will be shipped via Standard Ground Service at no cost to you.

International Orders

We utilize the USPS Global Package Link Program® and DHL® Express as our primary method to ship internationally. Please allow 7-10 days for delivery. Expedited service of 3-5 days is available for an additional charge. Additional freight charges will be billed to your credit card. If you request, we will ship your items through the World Mail® Service. Estimated delivery time is 15-25 days. Estimate the weight of your package and multiply by $6.50 per pound. Weights are included in each item description to help you. U.S. Cavalry does not guarantee World Mail® Service without insurance purchased at the time of the order.

The customer pays all shipping, insurance and customs fees, and assumes responsibility for any lost shipments to countries that don't allow us to insure shipments within their borders.

Canadian Customers: We're proud to offer our Quality Canada Service to you. With our service, we eliminate the $5.00 Canada Post package fee and take care of customs for you! Just add the 19% estimated duty and GST charge to your order as indicated on the order form and leave the rest to us.

For more information, call 1-502-351-1164 or FAX us at 1-502-352-0266. Our experts in Customer Service will be happy to assist you.

Returns and Exchanges

Your satisfaction is important to us. If an item does not meet your expectations, return it within 30 days and receive a replacement or refund. If possible, return the item in the original box and packing material, and refer to the back of your packing slip for additional details. We will credit your original method of payment, excluding shipping and handling charges. We don't accept returns on excessively worn or customer-damaged items. Custom items cannot be returned. If you still have questions, please call our Customer Service Department at 1-800-333-5102.

Important Customer Legal Information

U.S. Cavalry cannot know all of the local, state and federal restrictions for our products. Therefore, we do not warrant that you may legally purchase, own or carry specific products offered in our catalogs. Many states prohibit carrying concealed weapons and you must be guided by local laws regarding a concealable weapon. These products include, but are not limited to, chemical sprays, slingshots, air guns, paintball guns, knives, stun guns, starter pistols, bows, crossbows and other items. When you place an order with us for products that may have restrictions, you warrant to us that you are a legal adult without legal disabilities and are in compliance with local, state and federal laws.

Customers purchasing law enforcement insignia or uniforms marked with law enforcement terms such as "Police" or "S.W.A.T." or like messages warrant they are legally authorized to wear such mottos. Submit orders for such products on your department letterheads or provide official identification.

To assure that our operators are providing excellent customer service at all times, your call may be monitored.

(J) Laserhawk® Stealth Slingshot

NEW! The Bible tells us that David, a young shepherd boy, conquered the towering Philistine warrior Goliath with a simple sling and a stone. We don't recommend you challenge any nine-foot giants with the Laserhawk, but for outdoor target practice, it's perfect! One of the world's most versatile slingshots, it features an innovative design and a hyper-velocity tapered band which yields maximum power, velocity and performance. The Laserhawk is unique in that it allows the user to almost duplicate the draw, anchor and release positions used when shooting a bow. It's band system adjusts to meet your needs, while the padded contoured arm brace provides comfort and stability. The sculpted wraparound thumb and finger rests offer optimum stability and improves accuracy. Launches a variety of ammunition at speeds of up to 170 mph. Made of ABS plastic. Not recommended for children. USA. Wt: 1 lb. **Black.** *When using a slingshot, always remember to wear protective eyewear.*

(F) Mini Works Water Filter

NEW! It's a well-known fact that many of our world's rivers, streams and lakes are pervaded with disease-causing microorganisms and chemical pollutants. That's unfortunate, especially for military personnel, backpackers, camping enthusiasts and backcountry adventurers who rely on Mother Nature's outdoor resources. It's a problem, but fortunately there's a solution — our Mini Works Water Filter. Used by the U.S.M.C. (Amphibious Raids & Reconnaissance Division), it's highly cost-effective and easy-to-use. The filter's Marathon™ 205 ceramic element exceeds the EPA's "purifier" requirements for bacteria and protozoa removal. It's even effective against Brevundimonas diminuta — one of the smallest waterborne disease-causing bacteria (.3 micron). The filter element can be cleaned up to 40 times for superior recovery. Exceptionally compact, it fills a one-liter container in just 90 seconds! Includes tubing, a cleaning pad and a reusable stuff sack. USA. Wt: 1 lb. **Black.**

(H) 5500 Iron Mountain Pack

NEW! This pack elicited raised eyebrows from U.S. Navy SEALs, so we know you'll be impressed with it too! Silent and sleek, this pack's Quickdrawcord™ pockets eliminate the use of zippers and hook-and-loop fasteners. With a single pull, the pockets open and close quietly and reliably. The never-fail pocket access will not freeze or corrode from exposure. The 5500 Iron Mountain Pack is highlighted by the patent pending FlexStay™ system. Twin center mounted stays (6061 T6 aluminum) ride on the large muscles on either side of your spine for complete freedom of movement without sacrificing stability. The BackSupport™ waist belt, a blend of neoprene and laminated foams, supports the lower back allowing one to carry weight with maximum mobility. Its massive 5,490 cubic inch volume capacity allows one to carry all of their essential equipment and gear. Made of 500-denier Cordura® nylon, 430-denier pack cloth and Duraflex® hardware. USA. TANKER CAP DEVICE - PAGE 84

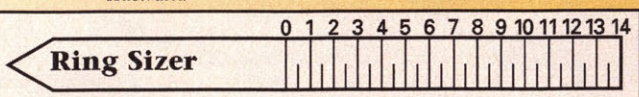
How To Find Your Ring Size:



1. Wrap a piece of string loosely around the base of your finger, allowing room for the knuckle.
2. With a pen, mark the point on the string where the end meets.
3. Using the chart, place the end of the string at the arrow point and compare.
4. Your marked point will indicate your ring size.

(C) GPS Travel Maps

Maps have been the most popular means of directing travelers for centuries, however in recent years, high-technology GPSs (Global Positioning Systems) have taken the world by storm. Why not incorporate both? From the makers of the manual, "A Comprehensive Guide to Land Navigation with GPS", these GPS-compatible highway maps will work with virtually every make and model of GPS receivers. Every map is presented as a usable scale, has a crisp, uncluttered appearance and effectively employs color and various other graphic techniques to enhance readability. Each map displays and labels easy-to-read locational grid lines — both UTM and MGRS. Ideal for motorists who spend a lot of time on the road. Perfect for military use as well. Each map also provides a full explanation of the UGPS Grid and includes a specific example of how it works. Imported. Wt: 6 ozs. Specify region (I-IV include four maps; V-VI include five maps).

(A) 8X Flashlight

NEW! Shed a little light on any subject. Actually, the 8X Flashlight will emit a lot of light! Among law officers, this flashlight is a godsend because it provides three times as much light as other flashlights of equal size. It yields 110 lumens of light output for 50 minutes and its nicad battery can be fully recharged in about two hours (charger not included). The tightly focused beam produced by the 8X is outstanding and the lamp reflector will never drift out of focus. There's no dark spots, rings or irregularities in the beam. The light turns on momentarily by pressing the rubber button at the end of the body. For constant light, just rotate the head counter-clockwise. Made of aircraft aluminum and O-ring sealed. USA. Measures 6$^{9}/_{10}$". Wt: 21 ozs. **Black.**
AA 18265.....Sugg. Ret. $162.00 **$89.88**

(B) 6P Flashlight

NEW! Every person should own a powerful flashlight like this one. Pefect for a law enforcement officer or home owner, the 6P Flashlight has three very important qualities — high light output (65 Lumens), small size (under 5" long) and a flawless beam (no dark spots or rings). Each lamp has been factory prefocused and permanently bonded in its own reflector. It's easy to operate too! Just push the button at the end of the body for momentary on/off or rotate the tailcap to turn on continuously. Made of rugged aircraft aluminum, it can also be converted to use rechargeable nicad batteries (conversion kit not included). O-ring sealed and water-resistant. Requires two lithium batteries (included). USA. Measures 4$^{9}/_{10}$" long. Wt: 7 ozs. **Black.**
AA 18264.....Sugg. Ret. $68.00 **$54.88**

(C) Sure-Fire 6Z Combat Flashlight

(F) Super Submersible Lite

A no-nonsense choice for the working professional, the Super Submersible Lite features a high-tech xenon bulb which produces a tightly focused white light beam with 400% increased net candlepower of ordinary "C" and "D" size flashlights. Tailor-made for use by fire departments, search and rescue teams, EMTs, police or military personnel, it can be depended upon in the most demanding situations. Highlighted by a virtually unbreakable ABS body with a high-impact polycarbonate lens, it is corrosion-proof and submersible to 2,000 feet. Meets military specifications. Capable of penetrating smoke, fog and water, its lamp life is 30 hours. Includes spring loaded belt clip, key ring and lanyard. Burn time of five to six hours on fresh batteries. Requires three C-cell alkaline batteries (not included). USA. Measures 7$^{1}/_{2}$" long. Wt: 7 ozs. Specify **Black or Yellow**.

(C) Brass Shield

Knighthood burst upon the scene in medieval Europe and remained steadfast well into the 16th Century. Revered for centuries due to their meritorious service, military skill, prowess, generosity, chivalry and obedience, all knights swore to be brave, courteous and to protect the defenseless — even if it meant dying for the cause. Their shield often made the difference between life and death. Today, knights are practically extinct, but our Brass Shield stands as a symbolic reminder of their valiant loyalty. This heraldic escutcheon, made of steel with embossed brass fittings, features two salient, combatant lions, a decorative crown and a circular ornament. Includes a rope handle on the back. Imported. Measures 28¹/₂ x 20¹/₂". Wt: 10 lbs.

(H) Buddy System

NEW! Everybody needs a buddy — a Buddy System that is! This unique system makes carrying and using a knife more convenient. It's designed with a one-of-a-kind locking mechanism that keeps the knife securely in place, regardless of position (upside down, sideways, backward or forward). Unless the sheath's spring-loaded button is pushed, the knife won't come loose. The sheath is designed so that you can use the end of your thumb (and not your index finger) to disengage the knife. To put the knife back, just reinsert it into the sheath. You can wear the Buddy System around your neck or attach it to a keychain or other gear — so it's perfect for military personnel, law enforcement, camping enthusiasts or scuba divers. The serrated blade is made of high-quality AUS8 stainless steel, while the handle and sheath are constructed of a GV6H Swiss polymer that doesn't absorb moisture. If properly cared for, not even salt water can hurt this knife system. Includes lanyard and split ring. Rockwell C: 57-58. USA. Overall 5⅛", blade 2⅛". Wt: 3 ozs.
